

# Global CRO Clinipace selects Trial Interactive's E-Feasibility and eTMF solutions to streamline its sponsors' studies

**Clinipace**   
CLINICAL RESEARCH

Clinipace was looking to upgrade their e-clinical infrastructure to provide sponsors with the flexible and responsive service they require. They turned to Trial Interactive to deliver best-of-breed site prequalification and eTMF technologies.

By choosing Trial Interactive's E-Feasibility and eTMF solutions, Clinipace has been able to successfully upgrade their internal systems while streamlining site feasibility and TMF processes. They can now enable sponsors to speed site activation and seamlessly launch their eTMF, ensuring inspection readiness while reducing costs and unnecessary risks.

“ ”

**Trial Interactive offered the intuitive interface, transparency, hosting, support, and validation that was essential to our decision. The additional willingness to work with our other vendors and integration partners made Trial Interactive the obvious choice.**
